GitHub: https://github/aayush0024 **Mobile:** +91-7888376973

Skills

- **Languages**: C++, Java, JavaScript, Python
- **Tools/Platforms**: MySQL, MongoDB, React.js, Node.js, Express.js, Git, GitHub, Postman
- **Soft Skills**: Adaptability, Problem-Solving, Leadership, Time Management

Projects

Bulletin Board – Blogging Platform | GitHub Nov' 25

- Engineered a full-stack client–server application with RESTful APIs for managing announcements, users, and categories using structured MongoDB schema design.
- Programed secure CRUD workflows with server-side validation and structured error handling to ensure data integrity and reliable request processing.
- Optimized database indexing and query structure, improving data retrieval performance by ~30% under concurrent usage scenarios.

Reconly – Transaction Reconcile System | GitHub Aug' 25

- Architected a Java-based reconciliation system using hash matching to achieve O(n) validation of large trade datasets.
- Implemented optimized SQL indexing and transactions in MySQL to detect trade breaks, duplicates, and mismatches with ACID compliance.
- Engineered MySQL controls to improve anomaly detection and ensure data consistency across reconciliation cycles.

NeuroWeave – AI Health Assistant Chatbot| GitHub Dec' 24

- Developed an AI-driven web chatbot integrating Gemini Flash API with structured JSON request handling and dynamic response rendering.
- Designed conversation flow control with input validation and fault-tolerant API handling to enhance interaction reliability.
- Fine-tuned prompt structure and asynchronous request handling, increasing response relevance and user engagement by ~30%.

Training

Lovely Professional University – Mastering Java for Application Development Aug' 25

- Built strong foundational and advanced Java programming skills, covering OOP concepts, GUI design with Swing, event handling, 2D graphics, and essential development tools.
- Improved the ability to create database-driven and network-based applications, including performing CRUD operations through JDBC and implementing client–server communication.
- Enhanced practical application through multiple hands-on projects, including games, utility tools, and data-driven applications, ensuring industry-oriented competence.

Certificates

- Master Generative AI and Generative AI tools | Udemy Oct' 25
- Privacy and Security in Online Social Media | NPTEL Sep' 24
- Introduction to hardware and Operating System | Coursera Mar' 24

Achievements

- Solved 350+ coding problems across LeetCode, GFG & HackerRank, sharpening problem-solving skills. Feb' 26
- Reached final round in Build-a-thon hackathon demonstrating strong problem-solving and coding abilities. Mar' 24

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.25 Aug' 23 - present

Kendriya Vidyalya No.1, Adampur Jalandhar, Punjab
Intermediate; Percentage: 74.80 Jun' 20 – Apr' 22

EMM AAR International School Jalandhar, Punjab
Matriculation; Percentage: 91.25 Mar' 18 – Apr' 20
